

IT IS TIME TO STOP...

...LOSING THOUSANDS!

On WASTED ENERGY

No Cost Energy Evaluation

The NRG Group’s business approach is different than most energy solution companies! Our philosophy to energy reduction is to be able to “affordably” reduce both electric and/or water waste by applying a combination of proprietary products that are customized to each specific building; achieve a minimum energy reduction of 10% for both electric and water.

NRG targets and provides solutions to what we refer to as a business’s “Energy Triangle”. This is comprised of three strategic areas within most businesses where energy is being wasted the most. By applying NRG patented products directly at the source has proven to be the most proficient and economical way to reduce energy waste.

NRG shall perform the following inspection (“Services”) at No Cost to the business

- Conduct an Energy Optimization Survey (EOS) of the building; A NRG consultant will do a visual tour, gather and record pertinent information about the sites energy usage and the areas where energy can be reduced.
- A “real time” energy monitor will be installed at no cost to the client to record kWh daily usage and additional information deemed necessary. (The energy monitor is property of NRG)
- Collect technical data to substantiate the amount of water/power usage can be reduced
- Determines the most cost effective measures that are required to reduce energy consumption by 10, 15 or 20 percent.
- Provide a written report on specific recommendations to achieve energy savings for the entire building; both interior and exterior (HVAC, Fans/Motors, Refrigeration, and water reduction).

Energy Survey Access:

Our NRG consultant will require access to obtain pertinent information and pictures of the site. The average time required for an EOS is about one hour. It will not interfere in the business’s daily operation. An appointment time will be arranged in advance. Preferred appointment times are generally set between 8:00 am to 9:00 pm. Special arrangements can be made, if necessary. Access to all the rooms is very important! All doors need to be unlocked or keys need to be provided.

Contract & Energy Proposal:

NRG Group will provide a complete No Money down Contract and Energy Proposal with specific energy reduction recommendations. All of our Contracts include an energy evaluation report, products, equipment description to be installed and the projected length of time for the Return on Investment.

Guarantees and Warrantees:

NRG Group will provide a written “guaranteed energy savings” contract that takes the risk out of purchasing our products and equipment. NRG is the only company in the industry that offers this type of guarantee and equipment warrantee. All our products and equipment have an unprecedented five (5) years parts and labor warranty. Option: An extended warranty for ten (10) years is available for a small monthly fee.

Acceptance of Terms:

The signee acknowledges he/she has the authority to make decisions and conduct business on behalf of the business’s location. Based on the utility information that was provided, if the results of the EOS reveal a minimum of ten (10%) percent (estimated \$ 2,500) can be achieved, with a return on investment (ROI) within eighteen (18) months and it is validated through real time kWh monitoring; the business agrees to execute a contact.

Legal Business Name (Client) _____ DBA Name: _____

Site Address: _____ City: _____ State: _____ Zip: _____
