

CELL PHONE AUDIT

We have partnered with the industries leading Cell Phone Audit Company to bring our clients the most comprehensive ongoing Cell Phone Audit available. Their audit saves you money, time and effort by reducing your cell phone bills and making them easier to manage, without being forced to change your carrier and equipment.

Save Money - They specialize in one thing - lowering company cell phone bills. Our typical clients save between 25% - 33%. They review your company's usage pattern and gain an understanding of your business rationale to create and sustain long-term savings.

Their Team Members have held positions with major wireless carriers working on pricing strategies. As industry insiders they apply their in depth knowledge, creativity and unyielding persistence to ensure our clients achieve the lowest possible spending level. Wireless customers are forced to rely on the carrier's Sales and Customer Service Representatives to provide them with the best possible pricing. These Representatives are incented to grow **THEIR** company's revenue. They cannot provide you with the lowest possible solutions. The expertise of our team ensures your savings is sustained.

Save Time - Clients have achieved over 40% annual savings in less than one hour of their time. We ask key questions relating to your cell phone usage and arrange for copies of previous bills. Our team create the analysis and recommendation in one week. This analysis includes a spreadsheet showing the recommended plans for each phone, how much the changes will save your company, and an overview of the plans. It also includes a detailed letter explaining the strategy. After you review the recommendation, one of our auditors will have a brief discussion with you and then we will implement the changes. That is all there is to it!

Save Effort - You don't need all the headaches associated with owning cell phones. We do the analysis and the implementation. We provide monthly updates on usage, new plans and potential savings opportunities.

Saving you money is as important to us as it is to you. Our fee is based on how much we save you. **If no such savings are accomplished, there is no fee.**

Why overpay? Let us help you save!
